

**Approved
By the General Director
«Terminal Logistics Services» LLP
Order dated 10 March 2017 No. P-1/1**

**POLICY OF
«Terminal Logistics Services» LLP
IN HEALTH, ENVIRONMENT, SAFETY AND ENVIRONMENTAL PROTECTION**

Our employees are the most valuable asset of «Terminal Logistics Services» LLP (the Company).

Our main task is to prevent any injury or illness associated with the work and to avoid negative impacts on the environment. This all is paramount importance for us, so Head is doing all he can within reason to accomplish this task.

We approach to organize the system of occupational safety, health and the environment in the way that match the best examples of our industry.

Health, safety and environmental protection are priorities in the planning and development of new processes and services.

We adhere to this principle that any accident can be prevented. We try to promote and use the latest technologies and developments in the field of safety, as well as guided by the highest standards of emergency without the work.

Our Company is committed continuously to improve health, safety processes and safety, without compromising quality of service.

Our goal is to minimize the number of accidents, injuries, occupational diseases and the level of negative impacts on the environment.

We recognize the importance of close cooperation with our Suppliers and Customers. Only through partnerships it is possible to achieve the best results in the field of health, environment and safety. This policy requires the involvement of employees in all activities related to health and the environment, not only on the Head's orders, but also because of the personal commitment of each person.

Our company believes that the responsibility of the Parties for the protection of health, safety and the environment are all the employees.

Management accepts the responsibility to monitor the health, safety and the environment program, effectively improve, and create a safe working environment for human health and the environment.

Heads of structural divisions, mechanic are responsible for the education of the appropriate relation to health, safety and the environment, especially at home, and then from subordinates. Every worker in the workplace is responsible for the organization of all production processes so that health, safety of the personnel and environmental protection were in the first place.

All employees of Company should promote compliance with all aspects of the health, safety and environment program.

Company intends to carry out its activities, constantly based on the principle: "This is our world and we can only protect them". We steadily are following this course, Company believes that investment in environmental protection is their duty. These principles are applied as during implementation of work in Kazakhstan and abroad, in accordance with international standards and norms.
